History And Evolution of SaaS

After A lot of consideration. I have decided to write a Term paper on history and evolution of SaaS, which is one of the service models in the cloud computing. it is considered to be one of the newly emerging and rapidly growing business model in the software industry. The paper gives a quick introduction on cloud computing, how cloud computing has evolved throughout the years, about SaaS, Application architecture of SaaS, how the internet availability has impacted the growth of it and the usage of SaaS over web or application.
